VALUE OF PRODUCTION.

Uniform methods for measuring the value of production were finally determined at a Conference of Statisticians held in March, 1935. The net values in accordance with the decisions of the Conference are shown in the following table for each year since 1928-29. It should be noted that neither maintenance costs of farm buildings and fences nor depreciation have been deducted and consequently the values given are overstated by these amounts. The figures have been prepared by the State Statisticians, largely from collected data. Where this has not been possible careful estimates have been made from the best available sources.
